***Drawings***

1. The drawings 1-4 are objected to because all elements in the figures and flow-charts are required to be distinctly labeled with appropriate legend. 37 CFR 1.84 (o). Correction is required.

***Election/Restrictions***

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-11, 19-29, 37-47, 55-65, drawn to Group I, classified in class 370, subclass 409.

II. Claims 12-18, 30-36, 48-54, 66-72, drawn to Group II, classified in class 370, subclass 418.

The inventions are distinct, each from the other because of the following reasons:

3. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as being used for transmitting at a higher rate than predetermined unit rate of the VC. See MPEP § 806.05(d). Invention II can be used for scheduling data flow for competing queues.

Art Unit: 2661

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
